

# Generitrack - Lite

A unique item tracking system for Assets tracking and Check out/in transactions.

## Generitrack Lite - Assets

**Generitrack Lite for Assets** allows companies to use our data collectors to carry out an inventory of existing assets and compare this with a listing.

Using our data collector to read asset barcodes and record a location. The collected data is uploaded to Generitrack to compare existing assets with listed locations and show new assets and locations.

**Generitrack** Displays differences in locations for existing assets and new assets by colour coding, making changes in asset inventory easy to see.

**Lite** also allows new assets to be added to existing or new locations.

**Lite** Asset allows the importing of data from a Comma delimited (CSV) file. So if you can export your current data to a csv file, you can use it with Lite Asset.

**Generitrack** includes the portable software, data collector and the pc software. It allows multiple data collectors to be used to take an inventory and upload to a single file and you can print barcode labels.

Data collected into Lite can be easily exported out to a CSV or Microsoft Excel file.

*Generitrack Lite for Assets is a package of data collector, pc software, collector software, set of 100 asset labels and instructions.*

## Generitrack Lite - Stockroom

**Generitrack Lite Stockroom** allows companies to use our data collectors to read item barcodes and record quantities of current stock and compare these with an existing record.

**Generitrack** also allows new stock to be added to existing stock levels using our data collector.

**Lite** Stockroom allows the importing of data from a Comma delimited (CSV) file. So if you can export your current data to a csv file, you can use it with Lite.

**Generitrack** includes the portable software, data collector and the pc software. Lite allows multiple data collectors to be used to take an inventory and upload to a single file and you can print barcode labels. Data collected into Lite can be easily exported out to a CSV or Microsoft Excel file.

*Generitrack Lite for Stock is a package of data collector, pc software, collector software and instructions.*
